2024 NATURAL JUTE COLLECTION

# NATURAL JUTE COLLECTION

**Sustainability:** Jute is one of the most sustainable and eco-friendly materials available. It is a fast-growing crop that requires minimal water and pesticides to cultivate, making it an environmentally responsible choice.

**Biodegradability:** Jute is fully biodegradable, meaning it naturally decomposes over time without leaving harmful residues. This property reduces its environmental impact and contributes to a healthier ecosystem.

**Renewable Resource:** Jute is an annually renewable resource, which means it can be grown and harvested each year without depleting the land or resources.
